**Rehab Center: Opiate Detoxification Institute**

**Description: The Opiate Detoxification Institute (ODI)<br>ODI's founding physician and leading expert in opiate detoxification, Dr. Richard Lipsky, performs the "GAAOD" (Rapid Detox) procedure under general anesthesia to strip the opiates from the brain's receptors. This procedure completely eliminates withdrawal reactions and provides patients with a fresh start to a meaningful and drug-free future.<br>Dr. Lipsky performs this cutting edge medical procedure involving less than one hour under general anesthesia, a major safety benefit, in a state of the art, award winning hospital in northern New Jersey. ODI is a team of consummate professionals who address both the physical and psychological sides of opiate addiction. Personalized care and empathy both prior to and post procedure with relapse preventing counseling is our hallmark.<br>Family of Origin program, a program that identifies family patterns and behaviors and is designed on an individual basis to develop a plan of action to permit the patient to live life without drugs. <br>ODI encourages the use of 12-step Programs for patients who are willing to use them.**
